UNITED STATES DISTRICT COURT  
NORTHERN DISTRICT OF CALIFORNIA  
SAN FRANCISCO DIVISION

UNITED STATES OF AMERICA,

Plaintiff,

CASE NO. CR-13-662-RS

## GOVERNMENT'S TRIAL MEMORANDUM

## CLIFFORD BERCOVICH HOWARD WEBBER

## Defendants.

## **INTRODUCTION**

On September 6, 2016, defendants Clifford Bercovich and Howard Webber were charged by superseding indictment with mail-wire fraud conspiracy, in violation of 18 U.S.C. § 1349; mail fraud, in violation of 18 U.S.C. § 1341; and aggravated identity theft, in violation of 18 U.S.C. § 1028A. ECF 153. The charges arise out of Bercovich and Webber’s scheme to obtain the identities of, among other demographics, inmates in Wisconsin and California, and unlawfully use those identities to file fraudulent tax returns in the names of the inmates which requested refunds from the Internal Revenue Service (“IRS”). Trial is currently set for January 9, 2017.

The government submits the following trial memorandum, which sets out the law of the charged offenses, the facts the government anticipates proving, and the evidence the government intends to offer during trial.

## **LAW OF THE CHARGED OFFENSES**

I. *Mail-wire fraud conspiracy, in violation 18 U.S.C. § 1349*

Section 1349 proscribes any attempt or conspiracy to commit mail fraud or wire fraud. 18 U.S.C. § 1349. The statute requires proof of two elements: (1) there was an agreement between the defendants to commit mail fraud or wire fraud; and (2) the defendant became a member of the conspiracy knowing of one of its objects and intending to help accomplish it. Model Crim. Jury Instr. 9th Cir. 8.20 (2010).

Unlike 18 U.S.C. § 371—the generic conspiracy statute—Section 1349 does not require the government to prove an overt act in furtherance of the conspiracy. *See United States v. Roy*, 783 F.3d 418 (2d Cir. 2015); *United States v. Rogers*, 769 F.3d 372, 380-82 (6th Cir. 2014); *United States v. Eason*, 579 F. App’x 807, 810 n.3 (11th Cir. 2014) (per curiam); *United States v. Pascacio-Rodriguez*, 749 F.3d 353, 363-64 & 364 n.49 (5th Cir. 2014); *see also Whitfield v. United States*, 543 U.S. 209, 219 (2005) (holding that where the text of a statute “does not expressly make the commission of an overt act an element of the conspiracy offense, the Government need not prove an overt act to obtain a conviction”).

The agreement itself does not need to be explicit. It is “sufficient if the conspirators knew or had reason to know of the scope of the conspiracy and that their own benefits depended on the success of the

1 venture.” *United States v. Montgomery*, 384 F.3d 1050, 1062 (9th Cir. 2004). The government may rely  
 2 on circumstantial evidence and inferences drawn from that evidence to prove both the existence of an  
 3 agreement, *United States v. Loveland*, 825 F.3d 555, 557 (9th Cir. 2016), and the defendant’s knowing  
 4 connection to the conspiracy. *United States v. Johnson*, 297 F.3d 845, 868-69 (9th Cir. 2002); *United*  
 5 *States v. Rizik*, 660 F.3d 1125, 1134 (9th Cir. 2011). Once evidence of a conspiracy is established, only a  
 6 slight connection between the defendant and the conspiracy is necessary to convict the defendant of his  
 7 knowing participation in the conspiracy. *United States v. Melchor-Lopez*, 627 F.2d 886, 890-91 (9th Cir.  
 8 1980); *United States v. Aichele*, 941 F.2d 761, 763 (9th Cir. 1991).

9 II. *Mail fraud in violation of 18 U.S.C. § 1341*

10 The mail fraud statute proscribes the use of an interstate mail carrier to execute a scheme to  
 11 defraud; or to obtain money or property by means of a false or fraudulent pretense, representation, or  
 12 promise. 18 U.S.C. § 1341. Section 1341 requires proof of four elements: (1) the defendant knowingly  
 13 participated in, devised, or intended to devise a scheme or plan to defraud, or a scheme or plan to obtain  
 14 money or property by means of a false or fraudulent pretense, representation, or promise; (2) the  
 15 statement or omission was material; (3) the defendant acted with the intent to defraud; and (4) the  
 16 defendant used, or caused to be used, an interstate mail carrier to carry out or attempt to carry out an  
 17 essential part of the scheme. *United States v. Woods*, 335 F.3d 993 (9th Cir. 2003).

19 The mail fraud statute was intended to be construed broadly. *See United States v. Sullivan*, 522  
 20 F.3d 967, 975 (9th Cir. 2008) (noting Supreme Court’s broad interpretation of fraudulent activity under  
 21 mail fraud and wire fraud statutes). To that end, the Ninth Circuit has found that “individuals who retain  
 22 or misappropriate the money or property of others, regardless of how they acquire it, fall within the  
 23 purview of mail or wire fraud.” *United States v. Jones*, 472 F.3d 1136, 1139 (9th Cir. 2007).

25 Materiality is an element of Section 1341. *Neder v. United States*, 527 U.S. 1 (1999). In the  
 26 context of mail fraud, a statement is material if it “had a natural tendency to influence, or [was] capable  
 27

1 of influencing, a person to part with money or property.” Model Crim. Jury Instr. 9th Cir. 8.121 (2010)  
 2 (citing *United States v. Peterson*, 538 F.3d 1064, 1072 (9th Cir. 2008)).

3 The specific intent element requires proof that the scheme was “reasonably calculated to deceive  
 4 persons of ordinary prudence and comprehension.” However, “reckless indifferent as to [the  
 5 statement’s] truth or falsity” is sufficient to sustain a mail fraud conviction. *United States v. Bohonus*,  
 6 628 F.2d 1167, 1172 (9th Cir. 1980). A jury can infer this intent by examining the scheme itself. *United*  
 7 *States v. Green*, 745 F.2d 1205, 1207 (9th Cir. 1984).

9 Mailing that is “incident to an essential part of the scheme” or “a step in the plot” satisfies the  
 10 final element of Section 1341. *Schmuck v. United States*, 489 U.S. 705, 712 (1989). The defendant need  
 11 not specifically intend to use the mail so long as use of the mail was reasonably foreseeable. *United*  
 12 *States v. Hubbard*, 96 F.3d 1223, 1227-28. In fact, the defendant need not even do the mailing—the  
 13 government is only required to prove that the defendant in some way caused the mailing. *United States*  
 14 *v. Manarite*, 44, F.3d 1407, 1412-13 (9th Cir. 1995).

16 The mailing to the IRS of a false tax return which requests a refund constitutes mail fraud.  
 17 *United States v. Kellogg*, 955 F.2d 1244 (9th Cir. 1992). However, the government does not have to  
 18 prove that the IRS actually issued the refund. Under the mail fraud statute, the scheme need not actually  
 19 be successful. *United States v. Utz*, 886 F.2d 1148, 1150-51 (9th Cir. 1989).

20 III. Aggravated identity theft, in violation of 18 U.S.C. § 1028A

22 The aggravated identity theft statute provides that whoever, during and in relation to a predicate  
 23 offense, “knowingly transfers, possesses, or uses, without lawful authority, a means of identification of  
 24 another person,” is guilty of a crime. 18 U.S.C. § 1028A. The statute requires proof of three elements:  
 25 (1) the defendant knowingly transferred, possessed, or used without legal authority a means of  
 26 identification of another person; (2) the defendant knew that the means of identification belonged to a  
 27  
 28

1 real person; and (3) the defendant did so during and in relation to a predicate felony. Model Crim. Jury  
 2 Instr. 9th Cir. 8.83 (2010).

3 Section 1028A(c)(5) provides that mail fraud is a predicate offense to aggravated identity theft.  
 4 Further, 18 U.S.C. § 1028(d)(7) defines a “means of identification” as “any name or number that may be  
 5 used, alone or in conjunction with any other information, to identify a specific individual, including any  
 6 name, social security number, date of birth, official State or government issued driver’s license or  
 7 identification number, . . . employer or taxpayer identification number.”

8  
 9 In *Flores-Figueroa v. United States*, 129 S. Ct. 1886, 1888-94 (2009), the Supreme Court held  
 10 that Section 1028A requires the government to prove the defendant knew that the “means of  
 11 identification” he unlawfully transferred, possessed, or used belonged to a real person. However, based  
 12 on the Ninth Circuit’s recent opinion in *United States v. Osuna-Alvarez*, 788 F.3d 1183, 1185-86 (9th  
 13 Cir. 2015), whether the defendant used the means of identification with consent or knowledge of the  
 14 owner is irrelevant.

15  
 16 **STATEMENT OF FACTS**

17 From mid-2010 to January of 2012, Bercovich and Webber conspired to obtain the identities of  
 18 inmates in Wisconsin and California, and unlawfully use those identities to file false tax returns which  
 19 requested refunds from the IRS.

20 The scheme started when Bercovich and Webber created a Limited Liability Company called  
 21 Inmate Asset Liquidation and Recovery Services (“IARLS”). As part of the creation of the company,  
 22 Bercovich opened several bank accounts with Wells Fargo under the name of IARLS. He also rented PO  
 23 Box 603 in Kentfield, California. Bercovich used the PO Box as IARLS’s mailing address. On the  
 24 application for PO Box 603, Bercovich listed Webber as the only other authorized user.

25 Bercovich then printed “information forms” on IARLS letterhead. These forms contained fields  
 26 for IARLS clients to provide their name, date of birth, and social security number. The information  
 27 forms contained fields for clients to provide their wages for each year from 2008 through 2010, and the

1 name of the person who referred the client to IARLS. Once Bercovich printed the information forms, he  
2 gave them to Webber, who was serving a term of imprisonment in the Wisconsin state prison system.  
3 Webber used the forms to solicit inmates to sign up for IARLS's services.

4 The purpose of these "information forms" was not to provide legal financial services for inmates.  
5 Instead, Webber used these forms to collect inmates' means of identification. In order to entice inmates,  
6 Webber promised IARLS could provide them with free government money if they filled out the form.  
7 The exact offer varied depending on who Webber was speaking to. Webber told some inmates that  
8 IARLS could help them reap the benefits of a new "Obama stimulus program." Webber told other  
9 inmates that they were owed some form of "back taxes." When inmates seemed skeptical, Webber  
10 reassured them by saying that he knew a lawyer in California who would help them through the process  
11 of getting money from the government.

12 On several occasions, Webber instructed inmates to write down that their wages for 2008  
13 through 2010 were at least \$7 thousand, even though the inmates had not earned such wages. Webber  
14 asserted to them that whatever their actual wages, they earned at least \$7 thousand per year by operation  
15 of law. He further explained that they would never need to substantiate this income with the IRS. If an  
16 inmate was particularly reluctant to report false wages on the information form, Webber told the inmate  
17 to write down only his personal identifying information and leave the section on wages blank—Webber  
18 then took the form and wrote in false wages for the inmate.

19 Once Webber convinced an inmate to fill out an IARLS information form, Webber mailed the  
20 form from prison to Bercovich, who used the personal identifying information on the form to file tax  
21 returns on behalf of the inmate for 2008 through 2010. The tax returns Bercovich prepared were  
22 remarkably similar. In general, the returns reported between \$6.5 thousand and \$7 thousand in wages,  
23 earned income credits of \$438 or \$457, and making work pay credits of \$400. Most importantly, all of  
24 the tax returns requested refunds. In the field of each return reserved for the taxpayer's address,  
25 Bercovich provided the address for PO Box 603.

26 On the 2008 and 2009 returns, Bercovich directed the IRS to send the refund checks to PO Box  
27 603. Once the paper refund checks arrived, Bercovich forged the inmates' signatures to endorse the  
28

1 refunds over to himself. He then deposited the refunds into one of the IARLS bank accounts. On the  
 2 2010 returns, Bercovich reported PO Box 603 as the taxpayer's address, but directed the IRS to  
 3 electronically deposit the refunds into one of IARLS's bank accounts. Once the refunds were deposited,  
 4 Bercovich and Webber paid a portion over to the inmates but kept the balance of the proceeds for  
 5 themselves.

6 Bercovich and Webber caused a substantial loss to the federal government: hundreds of nearly  
 7 identical, false returns reported PO Box 603 as the taxpayer's address. Each of these returns requested a  
 8 refund.

9 **ANTICIPATED EVIDENCE**

10 The government's case against Bercovich and Webber consists of testimony of IARLS inmate  
 11 victims and recruiters from Wisconsin and California; an expert in tax computation, accounting, and the  
 12 Internal Revenue Code ("IRC"); an expert in forensic computer investigations; the agents who  
 13 interviewed Bercovich and Webber; custodians of record who may authenticate and lay the foundation  
 14 for government records, bank records, postal records, records of incarceration, and records of inmate  
 15 financial accounts; jailhouse phone calls between Webber and Bercovich; and evidence found during the  
 16 execution of the search warrant on Bercovich's residence. Considering the volume of the government's  
 17 evidence, the government further intends to offer charts to summarize records which the jury cannot  
 18 easily examine in court.

19 I. *Inmate victims and recruiters*

20 The IARLS clients and recruiters—who were incarcerated in the California and Wisconsin state  
 21 prison systems—may testify regarding their interactions with Webber and Bercovich; how they met  
 22 Webber or Bercovich; Webber's explanation of IARLS's services; Webber's pitch to solicit IARLS  
 23 clients and recruiters; what was written on their information forms; whether they were incarcerated from  
 24 2008 through 2010, and if not, the income they earned in those years; the accuracy of the tax returns  
 25 filed in their names; whether they gave Bercovich permission to deposit refund checks issued in their  
 26 names or use their signatures; and how they were compensated as clients or recruiters.

1 II. *Tax computation and accounting expert*

2 IRS Special Enforcement Program and Revenue Agent James Oertel is an expert in tax  
 3 computation, accounting, and the IRC. Agent Oertel may provide the corrected tax computations for a  
 4 subset of IARLS's clients; and testify regarding who is entitled to report certain wages, credits, and  
 5 refunds. Agent Oertel's expert report compares the information reported on a subset of IARLS tax  
 6 returns to taxpayer information which was recorded on the IRS's Information Reporting Program.<sup>1</sup>  
 7 Applying the IRC to the information which was independently reported to the IRS, Agent Oertel  
 8 determined the corrected income, wages, credits, and refunds or liabilities for each of the IARLS clients  
 9 he audited. Agent Oertel then determined the variances between the IARLS refunds and the refunds to  
 10 which the inmates were actually entitled.<sup>2</sup>

11 III. *Forensic computer investigations expert*

12 During the execution of a federal search warrant on Bercovich's residence, agents seized a  
 13 computer and a cellular phone. When agents searched the computer, they discovered copies of electronic  
 14 tax returns which related to Bercovich and Webber's scheme; ledgers tracking tax returns Bercovich  
 15 prepared, treasury checks IARLS received, and payments to inmates; power of attorney forms which  
 16 purporting to give Bercovich the authority to cash clients' checks<sup>3</sup>; and different versions of IARLS  
 17 promotional materials which purported to explain the company's services. On the cellular phone, agents  
 18 discovered incriminating text message conversations involving Bercovich.

19 IRS Computer Investigations Specialist and Special Agent Jeffrey Jack is an expert in forensic  
 20 computer investigations. Special Agent Jack may testify to the computer imaging process; the process of  
 21 extracting data from the phone; and the forensic analysis of the electronic devices. Special Agent Jack  
 22 may further authenticate these files through a hash value comparison of the government's exhibits to the  
 23 files extracted from the electronic devices; and testify regarding the files' pathways, when the files were

24  
 25 <sup>1</sup> The Information Reporting Program is the IRS database which keeps track of income and withholdings  
 26 which are independently reported to the IRS (e.g., wages and withholdings reported on Forms W-2,  
 1099, etc.).

26 <sup>2</sup> Agent Oertel's report notes the limitations to his analysis, including the fact that not all income is  
 27 independently reported to the IRS.

28 <sup>3</sup> The government anticipates offering evidence that Bercovich was disbarred long before executing the  
 power of attorney forms with IARLS clients.

1 created, when the files were last altered, and other information pertaining to the creation and  
 2 modification of the files found on the electronic devices.

3 **IV. Agents who interviewed Bercovich and Webber**

4 IRS Special Agents Steve Martins and Adam Grey separately interviewed Bercovich and  
 5 Webber. Special Agents Martins and Grey may testify to the circumstances of the interviews; the  
 6 statements that Bercovich and Webber gave; and other information pertinent to those statements, i.e.,  
 7 Bercovich and Webber's demeanor during the interviews. Special Agents Martins and Grey may testify  
 8 that Bercovich and Webber both admitted to their involvement in IARLS and to facilitating the filing of  
 9 tax returns.<sup>4</sup>

10 **V. Custodians of record**

11 The government intends to offer IARLS's Wells Fargo Bank records; the United States Postal  
 12 Service application for PO Box 603; Bercovich's California State Bar profile; IRS records, including  
 13 certified tax returns and treasury checks; records of when inmates were incarcerated in Wisconsin; and  
 14 records of inmate financial accounts.<sup>5</sup>

15 Bank records show that Bercovich primarily used three Wells Fargo Bank accounts to operate  
 16 IARLS, receive electronic tax refunds, and deposit physical treasury checks. Those bank accounts were  
 17 opened in the name of IARLS, and were often used to remit payments on Webber's behalf. Similarly,  
 18 PO Box 603 was listed as the taxpayer's address on hundreds of tax returns. The application to PO Box  
 19 603 shows that Bercovich rented the postal box and listed Webber as the only other authorized user.

20 With regard to IRS records, the government has had approximately 700 IARLS tax returns  
 21 certified. Those tax returns list PO Box 603 as the taxpayer's address; are for tax years between 2008  
 22 and 2010; report wages of between \$6.5 thousand and \$7 thousand; often request direct deposit of the  
 23 tax refund into an IARLS bank account; and report nearly identical credits and refund amounts. Images  
 24

25 <sup>4</sup> Both Bercovich and Webber implicated the other during their interviews. To avoid any confrontation  
 26 issues, the government will prepare these agents to testify to the statements in a way which comports  
 with the requirements of *Bruton v. United States*, 391 U.S. 123 (1968).

27 <sup>5</sup> The majority of these records can be introduced with certifications that meet the requirements of  
 28 Federal Rule of Evidence 902(11). The government hopes to reach stipulations regarding the  
 admissibility of the remaining evidence for which the government has not obtained a Rule 902(11)  
 certification.

1 of the treasury checks show that the inmates' signatures were forged to sign the treasury checks over to  
 2 IARLS before they were deposited into an IARLS bank account.

3 Finally, records of incarceration show that many of the clients for whom Bercovich and Webber  
 4 filed 2008 through 2010 returns were in Wisconsin state prison while they were ostensibly earning  
 5 income. Records of those inmates' prison financial accounts suggest that Bercovich was paying inmate  
 6 clients and recruiters who had signed on with IARLS.

7 **VI. *Jailhouse phone calls***

8 While Webber was detained in the Milwaukee Secure Detention Facility ("MSDF"), prison  
 9 officials recorded Webber's phone calls. Those recordings capture Bercovich and Webber actively  
 10 discussing their scheme. Bercovich and Webber discuss inmates they had recently signed up, IARLS  
 11 recruiters, frustrations they encountered while carrying out the scheme, and expanding the enterprise  
 12 once Webber was released from custody. In a number of phone calls, Webber tells Bercovich to send  
 13 more IARLS information forms to MSDF, opines that it would be better to stop using Mayra Parl's tax  
 14 preparation software, tells Bercovich that he knows someone who will be able to recruit homeless  
 15 clients, and solicits Bercovich to pay IARLS clients and recruiters who are incarcerated in California  
 16 and Wisconsin. Meanwhile, Bercovich routinely updates Webber on the number of returns he filed, the  
 17 checks he received, and the inmates he paid.

18 **VII. *Search warrant evidence***

19 During the execution of the search warrant on Bercovich's residence, agents discovered  
 20 hundreds of IARLS agreements and information forms; IARLS promotional material; fraudulent  
 21 treasury checks; handwritten notes related to IARLS clients and recruiters; IRS correspondences to  
 22 "taxpayers" who were incarcerated in Wisconsin and California; letters from Webber and other IARLS  
 23 clients and recruiters; printed incarceration records for IARLS clients in Wisconsin; money orders in  
 24 envelopes addressed to inmates; and draft tax returns for IARLS clients.

25 **VIII. *Rule 1006 charts summarizing voluminous evidence***

26 Federal Rule of Evidence 1006 provides for the introduction of exhibits which summarize  
 27 voluminous, admissible evidence that the jury cannot easily examine in court. *United States v. Johnson*,

1 594 F.2d 1253, 1256-57 (9th Cir. 1979). Rule 1006 only requires that the underlying documents be  
2 admissible—the proponent need not actually offer the documents which were used to create the  
3 summary exhibit. *Johnson*, 594 F.2d at 1257 n.5; *United States v. Shirley*, 884 F.2d 1130, 1133 (9th Cir.  
4 1989); *United States v. Meyers*, 847 F.2d 1408, 1411 (9th Cir. 1988).

5 The government intends to introduce charts which summarize certain categories of voluminous  
6 evidence. In particular, the government intends to offer charts summarizing the information reported on  
7 IARLS tax returns which list PO Box 603 as the taxpayer address; records from three IARLS Wells  
8 Fargo Bank accounts; information forms discovered in Bercovich's residence during the execution of  
9 the search warrant; treasury checks deposited into IARLS bank accounts; and electronic tax returns  
10 discovered on Bercovich's computer.

11 **CONCLUSION**

12 There is sufficient evidence to prove beyond a reasonable doubt that Howard Webber and  
13 Clifford Bercovich are guilty of the crimes charged in the superseding indictment.
